Min's Construction Company, General and Commercial Contractor in Los Angeles

In the past, green building was viewed as a boutique option for commercial construction for Los Angeles residents who are willing to pay top-dollar to equip their property with eco-friendly materials. However, today, green building is simply the most effective building solution for those who want the most high quality, yet cost-effective results from their construction company in Los Angeles. As green building has evolved, one company has remained at the forefront of the field since the beginning: Min's Construction. Since 1979, we've been serving California customers with energy-efficient, sustainable construction that allows your facility to be reached by all prospective patrons and customers.
Accessibility and Efficiency

Accessibility Efficiency

As a renowned green building commercial construction company in Los Angeles, we have years of experience providing our clients with both new construction and renovations that ensure their structures meet local construction codes and ADA standards. This means that individuals with special physical needs will be able to access your property.

ADA standards are issued by the Department of Justice and the Department of Transportation, and are designed to ensure that places of public accommodation, as well as "commercial facilities" are accessible. The most recent ADA Standards offer minimum requirements for newly designed and constructed or altered public accommodations and commercial facilities to be accessible and usable by individuals with disabilities. In the past, our commercial contractor in Canoga Park delivered exceptional results to clients in need of construction services that include:

- Tenant improvement
- Remodeling restrooms and ramps and all other modifications to meet ADA requirements
- Painting, drywall, general construction
- Plumbing, electrical cool white roofing
- Concrete, bricks and block construction

A Construction Company Built on Loyalty

Don't feel bad if you haven't heard of our construction company in Canoga Park before – it's only because we spend very little on advertising. Instead, we prefer to pour our resources into using the best possible materials, and count on the praise from our many satisfied clients to spread the word about our services. This method of marketing ensures that our clients remain our most valuable asset, so you can rest-assured that we do everything we can to make certain they remain satisfied with the work we do at every step of the process.

If you have any questions about the green building we do at Min's Construction, or for a free quote on our service, contact us today at (818) 631-0552. We provide our customers with service in five difference languages, including English, Spanish, Korean, Japanese and Indian. No matter what your cultural background may be, you can count on Tiffany's Construction to take the worry out of your hands, and perform the green building you need.

Pride & Quality at its Extreme !
